

Omega Concrete Mixers Unveils the New PB MXR

WEST DES MOINES, Iowa (Aug. 27, 2021) – Omega Concrete Mixers today unveiled its new Pre-Blended Mixer (PBMXR) designed for the distribution of pre-blended cementitious materials for infrastructure work and repair.

“The Gooseneck Trailer mounted PB MXR is a self-contained unit powered by a 49 HP Deutz diesel engine. It provides customers with flexibility of purpose and ease of transport for any number of projects including specialty applications such as using rapid set materials,” said **Beth Ann Mahaffey**, president of Omega.

This 3-yard plus capacity mixer is mounted on an 18-foot trailer and features a 100-cubic-foot material bin and a 250-gallon water tank. The PB MXR in trailer application has an unloaded weight around 13,400 lbs. and can be towed to your job sites using your existing heavy-duty pickup truck.

“In addition to road and infrastructure repair, the Omega PBMRX can be used in landscaping and light commercial work,” Mahaffey noted.
