CONCRETE MIXERS
MADE IN THE USA

GUNITE AND SHOTCRETE

Shotcrete and Guniting are popular methods for concrete placement employed to build pools, water features, and landscaping as well as projects such as embankments, tunnels and soil stabilization structures. Both of these processes involve high-powered, high-velocity spraying of concrete using either a wet shotcrete mix or a dry-mix guniting. Either shotcrete or guniting can make quick and clean work of any number of projects where traditional concrete isn't feasible—providing you have the right mixer.

LET OMEGA CONCRETE MIXERS BUILD YOU THE RIGHT MACHINE FOR YOUR BUSINESS!

Omega's Rhino Guniting mobile mixers are designed for shotcrete and guniting applications, providing the tools, features and power you need for any number of projects. Materials can be moved on site, allowing you to do the job of multiple trucks with one Omega Rhino Guniting machine.

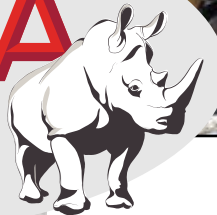

As an owner, you have more control over pour times, slump, mix design and quality. Omega's mobile mixers provide a fresh **GREEN** solution with higher efficiency and far less waste.

Omega Rhino Guniting mixers are performing shotcrete and guniting projects across the United States.

SPECIFICATIONS

GENERAL FEATURES

- 10-yard (9.144-meter) fabricated 10-gauge steel aggregate bin 7-gauge steel supports
- Danfoss motors and Parker high-flex hoses
- Continuous aggregate bin
- Manual gate
- 125 cubic-foot cement bin
- Oversized 20-inch diameter pivot ring for improved flow of material and reduction of material build-up
- Specialized pump for shotcrete and gunite applications

HYDRAULIC SYSTEM

- Cooler to prevent heat buildup
- Adjusted chain auto oiler with brush application on conveyor chain
- Centrally located air valves and accessory hose

HIGH CAPACITY ADVANCED MIXING CHAMBER

- Advanced high energy 9-foot mixing auger (12-inch diameter) with AR flighting, which extends the life expectancy of the auger
- Omega motors provide more torque; you will NOT bog down this auger
- Sealed bearing system for mixing auger
- Hydraulic horizontal left-right auger control

ELECTRICAL CONTROL PANEL

- Industrial-grade weather-resistant quick release wire harness system
- Modular design of control allows for easy upgrade
- Professional grade wire and harness assembly

OPTIONAL FEATURES

- 500-gallon water tank with hosing
- Pneumatic fill and bag house for continuous cement bin loading
- Electrical tarp cover
- Aluminum or painted steel fenders
