POLY | MXR

For Maximum Results

THE OMEGA POLY MXR

The POLY MXR stands out as a fully designed and engineered mobile polymer mixer. Rather than converting an existing volumetric mixer into a poly, Omega designed the POLY MXR for the special functions, operations and projects performed best by poly mixers including the installation of protective coatings for bridges and roads.

Features of the POLY MXR include a large displacement motor (Danfoss), larger aggregate bins for more capacity, a specialized electronic control system, easy-to-clean resin hose setup and interchangeable resin tank system.

POLYIMXR

SPECIFICATIONS

GENERAL FEATURES

- 12-yard (10.97-meter) fabricated 10-gauge steel aggregate bin 7-gauge steel supports
- 70/30 steel (rock/sand) divider
- Engineered to prevent bridging of materials
- Two chemical tanks
- Oversized 20-inch diameter pivot ring for improved flow of material and reduction of material build-up

HYDRAULIC SYSTEM

- Variable speed flow controls for belt
- Extra capacity hydraulic reservoir
- Cooler to prevent heat buildup
- Special hydraulic swivel system for horizontal auger mixer movement
- Features premium flat face “O” ring hose fittings to eliminate leaks

HIGH CAPACITY ADVANCED MIXING CHAMBER

- Advanced high energy 9-foot mixing auger (12-inch diameter) with AR flighting, which extends the life expectancy of the auger
- Omega motors provide more torque; you will NOT bog down this auger
- Sealed bearing system for mixing auger
- Hydraulic horizontal left-right auger control

ELECTRICAL CONTROL PANEL

- Industrial-grade weather-resistant quick release wire harness system
- Printer output for job tracking

OTHER OPERATING FEATURES

- Built-in mixer diaper to contain loose aggregates
- Drop-down auger boot
